

XM should be able me with "locally oriented" content, including the new XM Instant Traffic & Weather channels. People with XM are paying for sevice we should not be limited to non Local oriented content. Instant Traffic and Weather channel for the Detroit area tells me more than the local stations. I feel that XM should be able to provide this sevice. If they do not do a good job at it then people will not listen to it. It should be up to the people.
